Cummins and Ram Truck Celebrate Production of the 3-Millionth Cummins Engine

- Milestone engine will be paired with 2019 Ram 3500 Longhorn Crew Cab Dually 4x4
- Ram Truck/Cummins partnership spans more than three decades
- First Cummins-powered Ram truck was sold in 1988 for 1989 model year
- Cummins 6.7-liter I-6 high-output engine first to break 1,000 lb-ft of torque barrier

September 27, 2019, Columbus, Indiana - Cummins Inc. has produced its 3-millionth diesel engine for Ram trucks at its Columbus Mid-Range Engine Plant (CMEP) in Indiana today, highlighting the latest milestone in a partnership that spans more than three decades.

"The relationship that Ram Truck has with Cummins is one of the industry's most enduring, and continues to raise the bar for power and durability," said Reid Bigland, Head of Ram Brand. "Both companies have benefitted from this partnership, but Ram customers truly get to enjoy the toughness and best-in-class capability that a Cummins-powered Ram Heavy Duty truck delivers."

The new, groundbreaking 400-horsepower, 6.7-liter inline six-cylinder turbodiesel high-output engine is the first engine to break the four-figure torque barrier and boasts a host of upgrades, including new block, pistons, cylinder head and valvetrain, for more power, better fuel efficiency and reduced Noise, Vibration and Harshness (NVH). This milestone adds to a legendary history:

- 1988: introduced first Cummins-powered Ram for model-year 1989
- 1996: exceeded 200 horsepower
- 2001: surpassed 500 lb.-ft. of torque
- 2007: launched 6.7-liter, 350-horsepower engine
- 2013: reached 385 horsepower, 850 lb.-ft. of torque

Ram Truck and Cummins are celebrating this newest milestone with a group of 20 Cummins employees who have been working on Ram Truck - Cummins engines since the inception of the companies' partnership.

"We are grateful to Ram for choosing Cummins-powered engines for the Ram for 30 years, and we look forward to a long partnership," said Melina Kennedy, Executive Director of Cummins Pickup Business. "From our 5.9-liter, 400 ft.-lb. beginnings to the 6.7-liter, 1000 ft.-lb. engines available in today's Ram pickups, Cummins and Ram lead the way in innovation, power and durability," she continued.

Cummins' Columbus Mid-Range Engine Plant (CMEP) is 600,000 square feet, employs 900 people and has the capacity to produce 168,000 engines a year.

The purchaser of the Ram with the 3-millionth engine will be identified after the truck is built. Ram is planning a celebration of the completed truck at the dealership involved at a later date.

About Cummins

Cummins Inc., a global power leader, is a corporation of complementary business units that design, manufacture, distribute and service a broad portfolio of power solutions. The company's products range from diesel and natural gas engines to hybrid and electric platforms, as well as related technologies, including battery systems, fuel systems, controls, air handling, filtration, emission solutions and electrical power generation systems. Headquartered in

Columbus, Indiana (U.S.A.), since its founding in 1919, Cummins employs approximately 62,600 people committed to powering a more prosperous world through three global corporate responsibility priorities critical to healthy communities: education, environment and equality of opportunity. Cummins serves customers in approximately 190 countries and territories through a network of approximately 600 company-owned and independent distributor locations and over 7,600 dealer locations and earned about \$2.1 billion on sales of \$23.8 billion in 2018. Ram Truck Brand

In 2009, the Ram Truck brand launched as a stand-alone division, focused on meeting the demands of truck buyers and delivering benchmark-quality vehicles. With a full lineup of trucks - the Ram 1500, 2500/3500 Heavy Duty, 3500/4500/5500 Chassis Cab and ProMaster - the Ram brand builds trucks that get the hard work done and families where they need to go.

Ram continues to outperform the competition and sets the benchmark for:

- Best-in-class standard horsepower
- Segment-first 1,000 lb.-ft of torque with Cummins Turbo Diesel
- Most luxurious: Ram 1500 Tungsten with real metal and leather elements and a new 14.5-inch Uconnect touchscreen
- Best ride and handling with a double wishbone front suspension and five-link solid rear axle with available, segment-exclusive, active-level, four-corner air suspension
- Best-in-class available rear leg room
- The most cargo space available in any traditional full size cargo van
- Most capable full-size off-road pickup – Ram Power Wagon
- Most awarded light-duty truck in America
- Highest owner loyalty of any half-ton pickup

The latest [J.D. Power APEAL study](#), which rates the emotional bond between customers and their vehicles, named the 2023 Ram 1500 as the best full-size light-duty pickup.
