¹ Certified to the Federal Regulations that allow less forceful front air bags. Always use seat belts. Children 12 and under should always be in a back seat correctly using

an infant or child restraint system, or the seat belt positioned correctly for the child's age and weight.

² No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

³ Always check entire surroundings before backing up.

⁴ Requires Bluetooth® enabled mobile phone
